

# Faucet Part Identification

## Activity 17c

**REQUIRED MATERIALS:** No outside materials required.

Use the diagram below to answer the following questions:

Which part would be attached to a branded tap handle?

---

Which part creates a seal between the faucet and the faucet shank so that beer will not leak from the faucet when it is mounted on the draft tower?

---

Which two parts come into contact to stop the flow of beer when the faucet is shut off?

---

What would likely happen if you removed item 11 and then tried to use this faucet?

---
